NeuroLM stage two: GPT-2 + repaired 5-epoch VQ
EEG next-second cross entropy
Text next-token cross entropy
EEG token accuracy
Text token accuracy
Training batch
Fixed held-out probe
Optimizer update
100-update warmup experiment; global EEG/text batch 480/32; VQ frozen.
Balanced held-out probe: 32 windows per dataset (160 total). Not downstream task evaluation.
